

Winter Weather in BCL

Every Storm Is Different.

- We usually wait until we get 2 to 3 inches of snow to start plowing.
- We plow all the roads and depending on the temperature and future temperatures, we apply anti-skid to hills and intersections.
- The anti-skid is crushed stone used for traction.
- We **refrain from salt** because we do not want to contaminate our beautiful lake.
- Please keep in mind:

When you are clearing the snow from your property and vehicles, please **do not put it into the streets.**

Thank you!
